IT Services for Accountancy Firms

In-depth knowledge of accountancy practices' IT needs

As an established strategic IT consultancy firm, HW Technology understands the challenges of running a busy accounting practice and specialise in accountancy systems. Our bespoke managed IT solutions deliver measurable results specifically for accountancy firms.

We will work with you to develop an IT infrastructure to support your firm's needs and free you to focus on your business. Our IT services enable you to scale your workload and give you the agility to adapt to business peaks. We design technology solutions that will scale as your practice expands. We make new business acquisitions easier and create a migration path to merge acquired firms into your practice

Our technology consulting services embed best practice throughout the IT system and provide full documentation to create a roadmap for your IT infrastructure. We offer the choice of local technology platforms, cloud-based hosted platforms or hybrid solutions. Our hosted desktop platform is relied on by many accounting firms to give them the flexibility to serve their clients more efficiently. Our in-depth knowledge of accounting systems and practices ensures rapid issue resolution and close alignment of the IT system with business needs. Other managed services include support and remote assistance, data security and web development packages that can include hosting and maintenance.

Hosted desktop for accountants

Adopting a hosted desktop platform allows accountants to work seamlessly wherever business takes them. Hosted desktop solutions provide secure, cloud-based technology that can be accessed anywhere, any time, via an internet connection. Whether you need to be in another office, client site, or working from home, you have the flexibility to work from wherever your business requires. Staff can work offsite, easily gaining access to their systems using their regular login process. Productivity is increased as employees no longer need to be restricted to a single office desk or device. Hosted

desktop helps to establish best practice in data management, ensuring data security standards as well as regulatory compliance requirements are met. We understand and have expertise in all the standard accounting systems such as Sage, Xero, IRIS, CCH, and can support your team wherever they may be.

Features & Benefits

Accountancy focus

In-depth knowledge and expertise of accountancy systems combined with experience of working with a wide range of accountancy clients.

Bespoke IT solution

IT solutions tailored to support your firm's growth objectives and clients' needs

Cloud technology

Choice of public or private cloud, or hybrid, specifically designed for your firm – enabling you to work anywhere, any time, on any device

Security

Security is integral to our bespoke IT solutions, designed to keep valuable client data and practice assets safe and guard against cyber threats

Scalable systems

A roadmap for your IT system that will scale with your firm's expansion and acquisition path

Business continuity, backup and disaster recovery

Preparation of a comprehensive business continuity plan, aligned to regulatory requirements, which will enable the firm to continue in the event of a major system outage
